

Energy Policy

Gränges Americas Inc. strives to utilize Energy on the most efficient way, during the planning, manufacturing, production, and transportation stages of our products, all that in compliance with applicable laws, regulations, internal standards, and other applicable requirements related to energy efficiency, energy use and energy consumption.

In order to accomplish our purpose, Gränges Americas Inc. has set the following goals:

- Optimization of energy consumption per pound of metal produced.
- Rooting a strong awareness around the responsible use of energy at all functional levels within the organization.
- Supply of Energy from renewable sources (if available), or self-generated (whenever possible and economically feasible).

Top management shall establish an energy policy that:

Is appropriate to the purpose of the organization.

Provides a framework for setting and reviewing objectives and energy targets.

Includes a commitment to ensure the availability of information and necessary resources to achieve objectives and energy targets.

Includes a commitment to satisfy applicable legal requirements and other requirements related to energy efficiency, energy use and energy consumption.

Includes a commitment to continual improvement of energy performance and the EnMS.

Supports the procurement of energy efficient products and services that impact energy performance.

Supports design activities that consider energy performance improvement.

We can achieve our goals by:

- Determination, measurement and tracking of energy performance indicators (EnPIs) on machinery level, process level, plant level and region level.
- Continuous improvement of the Energy Management System (EnMS) by being routinely assessed for effectiveness and revised as necessary.
- Continuous improvement of energy performance, considering EnPIs and EnMS as foundational principles.
- Providing information, data quality, infrastructure, and other necessary resources.
- Supporting the procurement of machinery and equipment with the best energy efficiency available.
- Conceptualize, design and control of facilities and processes in accordance with technical factors that are energy influenced.
- Assessment of our own conduct, risk opportunities monitoring and continuous development of our action plans.
- Periodically communication with our employees, and other interested parties regarding energy consumption data as well as achieved goals.

It is the responsibility of each associate to ensure that all operations in the company are carried out in accordance with this policy. This policy is also intended to be distributed and available to suppliers, contractors, clients, and other interested parties, as the success of this Energy policy is only achievable with the active participation of those involved in Gränges Americas Inc. activities.
